SpeedCatch™ SoC designed to capture clear car plates on moving vehicle at up to 250 km/h speed. It is ideal for highway and city surveillance application.

Avoid image distortion on high-speed vehicle, ensuring in-depth detail of fast-moving and high-paced vehicle, such as collection of highway traffic violation evidence, or toll collection points control for container logistics.

The extreme WDR with multi shutter enhancement enable camera to produce detailed and true color images, even with difficult lighting situations such as strong lighting environment.

Embedded with rich IO ports. It can be used to trigger sensors such as flash light, accessory control, in order to fit difficult installation requirements on highway application.
